

VOLCANOES

Volcano is a
mountain but in
his hole there
is a **lava** that
comes from
under the
ground.

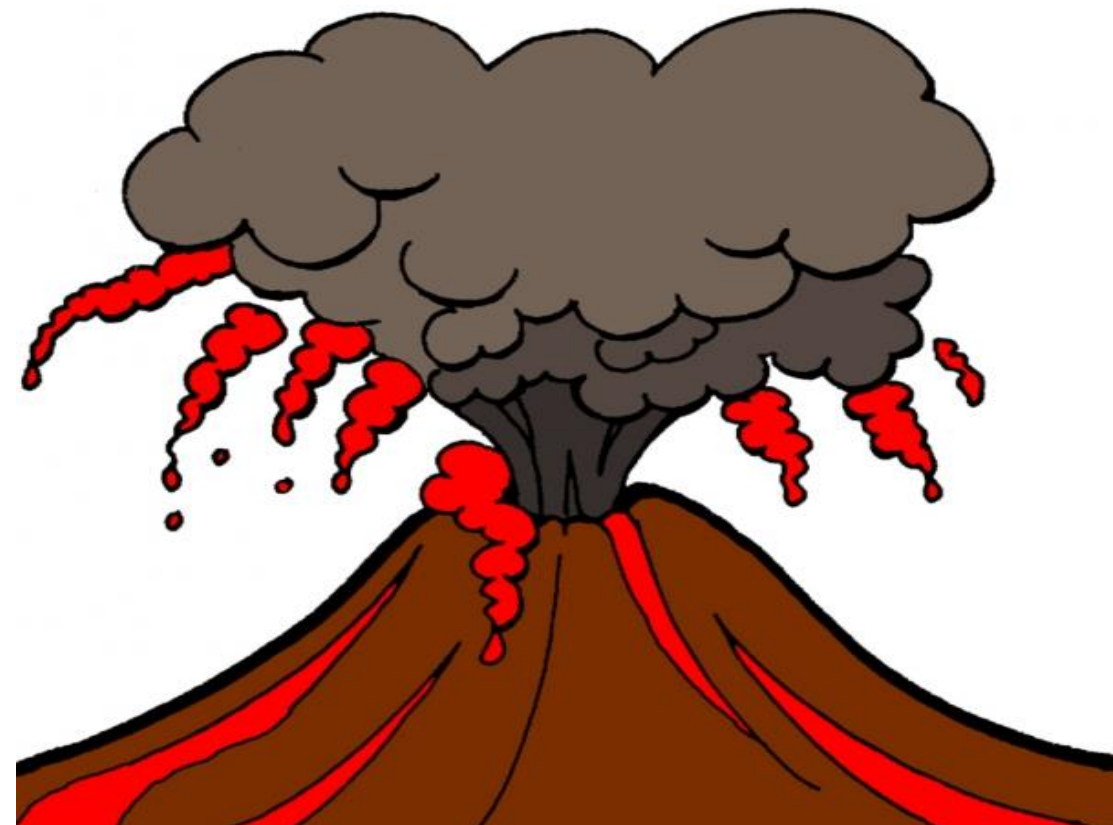

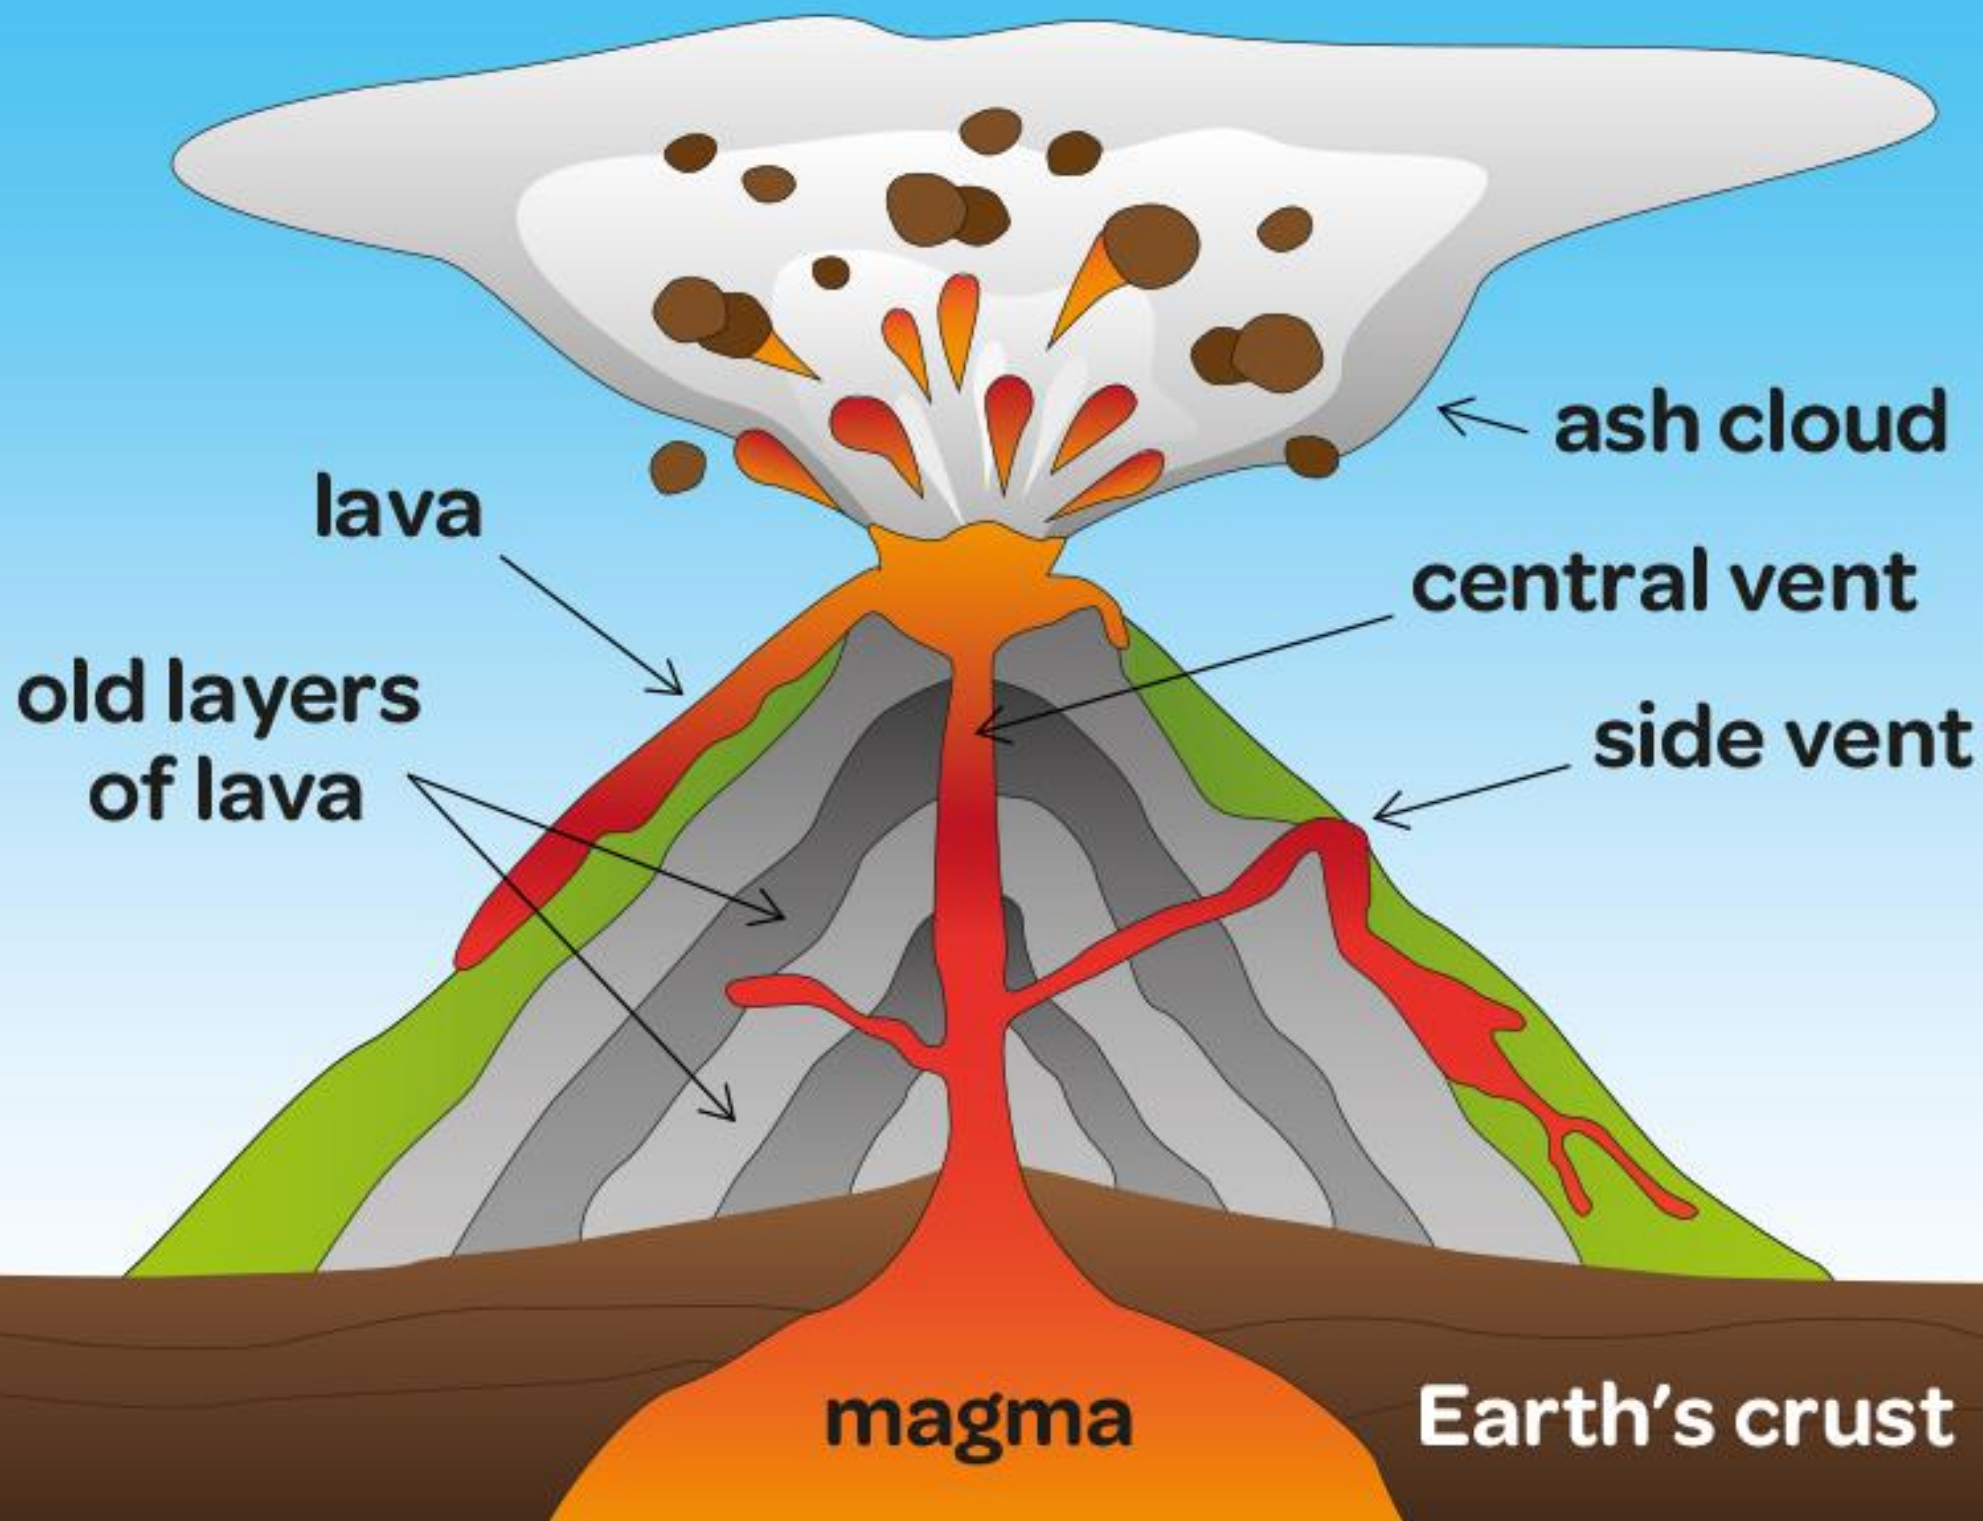

**When a volcano is active,
materials come out of it.
The materials include lava,
steam and broken rock
pieces.**

HOW IS MADE

A VOLCANO?

TYPES OF VULCANOES

When the magma is poor of silica, the lava is liquid and coming out from crater it can create lava lakes. In this type of volcano the crater is always large.

VOLCANO'S LIFE

A volcano can be:

-ACTIVE

-QUIESCENT

-EXTINCT

GEYSER

**They are
spectacular
jets of very
hot water
and they
come out of
the ground
for the high
pressure.**
