

RECYCLING TECHNOLOGY

MOST OF THE PEOPLE IN EUROPE HAVE A SMARTPHONE, PEOPLE IN DEVELOPING COUNTRIES, DON'T OFTEN HAVE A MOBILE PHONE; IN DEVELOPED COUNTRIES PEOPLE HAVE TWO OR THREE PHONES AND THEY WATCH THEM EVERY 6 MINUTES.

PEOPLE USUALLY CHANGE THEIR PHONE EVERY TWO YEARS AND THE OLD PHONES STAY IN PEOPLE'S HOUSE AND THEY ARE NOT USED.

THERE IS **NOMOPHOBIA** AMONG YOUNG PEOPLE THAT IS THE FEAR OF NOT HAVING YOUR PHONE WITH YOU.

A GOOD WAY TO RECYCLE YOUR PHONE IS TO SELL IT BECAUSE YOU RECEIVE MONEY AND YOUR PHONE HAS A NEW LIFE. ANOTHER WAY TO RECYCLE YOUR PHONE, IS TO GIVE IT TO CHARITY.

MOBILE PHONES ARE IMPORTANT IN DEVELOPING COUNTRIES BUT THERE AREN'T GOOD LANDLINES THERE AND MOBILE PHONES ARE A USUFUL SOLUTION.

IF A PHONE DOESN'T WORK, YOU CAN RECYCLE THE MATERIAL OF THE PHONE. THERE ARE RECYCLING COMPANIES THAT SEPARATE AND SEND IT TO PRODUCERS OF ELECTRONIC PRODUCTS. SO THEY USE IT TO MAKE CARS OT TVS

MOBILE PHONES CONTAIN METALS LIKE GOLD, SILVER, COPPER AND PLATINUM AND THEY ARE UNDER THREAT.
